## Experience

---

### Freelancer / Python Developer

February 2019 – Currently, Cracow

In late 2018, **Utopian-io** started to have internal issues and stopped being profitable, resulting in many of my colleagues being fired. As a direct result of that, I left the company in early 2019 to pursue a more stable work environment. Since then, I've been operating as a freelancer for simple web applications and Python software, learning new technologies and slowly applying to jobs.

### Utopian-io / Python & Javascript Developer

June 2018 – February 2019, Roma (Italy)

Thanks to me dropping out of a regular school system, I had a lot of time on my hands. I decided to put this time into good use and finally pursue my passion of coding. A few months after joining the team as a Community Manager, I convinced my boss to let me take up an extra position as a Junior Developer. Due to a small amount of team members, I'd work on small projects by myself, but a senior developer did provide a sufficient code review process. Some of the projects I was responsible for include:

**automating google spreadsheets** operations; creating a **social media bot** (Discord); writing a **REST API (Flask)** based on the data we collected from the STEEM network; creating a simple **browser extension** for our users;

### Utopian-io / PR / Community Manager

March 2018 – February 2019, Roma (Italy)

Due to my interest in the cryptocurrency STEEM at that time, I managed to find myself a position at a startup company well known in the network. I got offered a remote job, as the company hired people from all around the world. With over 5000 monthly users, me and my colleagues were directly (and equally) responsible for PR and Community Management. We worked on pages long proofread documents setting the guidelines for our volunteers and users, managed social media accounts of the company and provided customer support. We were also responsible for looking over a team of volunteers each, giving them guidance and rating their work in a weekly voice conference.

---

## Education

---

### OKE (Government Extramural Exam) / Secondary Education

January 2018 – February 2019, Cracow

After my decision to drop out of **Zespół Szkół Łączności**, I've spent most of 2018 preparing myself for a government extramural exam ([pol.] szkoła eksternistyczna) to finish my secondary education. I've passed all of the exams in February of 2019.

### Zespół Szkół Łączności

September 2016 – January 2018, Cracow

My secondary education began at a very renowned technical school in Poland - Zespół Szkół Łączności in Cracow. After roughly 2 years of studying there, I've discovered that I have no passion for the subject taught there (telecommunication). Because of that, but also due to the ever increasing pressure

from my teachers and an opportunity given to me by **Utopian-io**, I've decided to drop out and finish my secondary education by passing an official government extramural exam.

---

## Achievements

---

Perfect 5/5 star rating on my Freelancing profile with 23 completed orders. A few more orders were completed off-site with positive feedback.
